# Your Virtual Senior Manager

Understand  
your skill

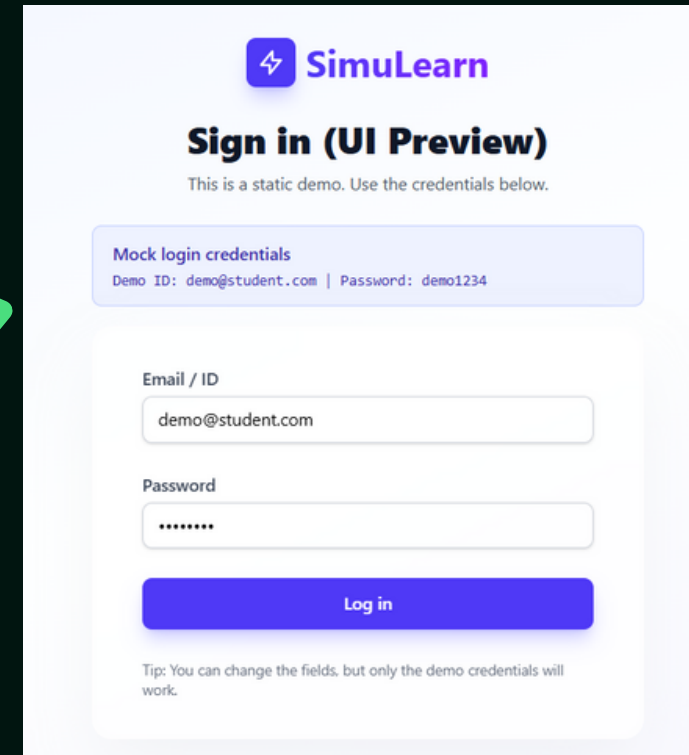

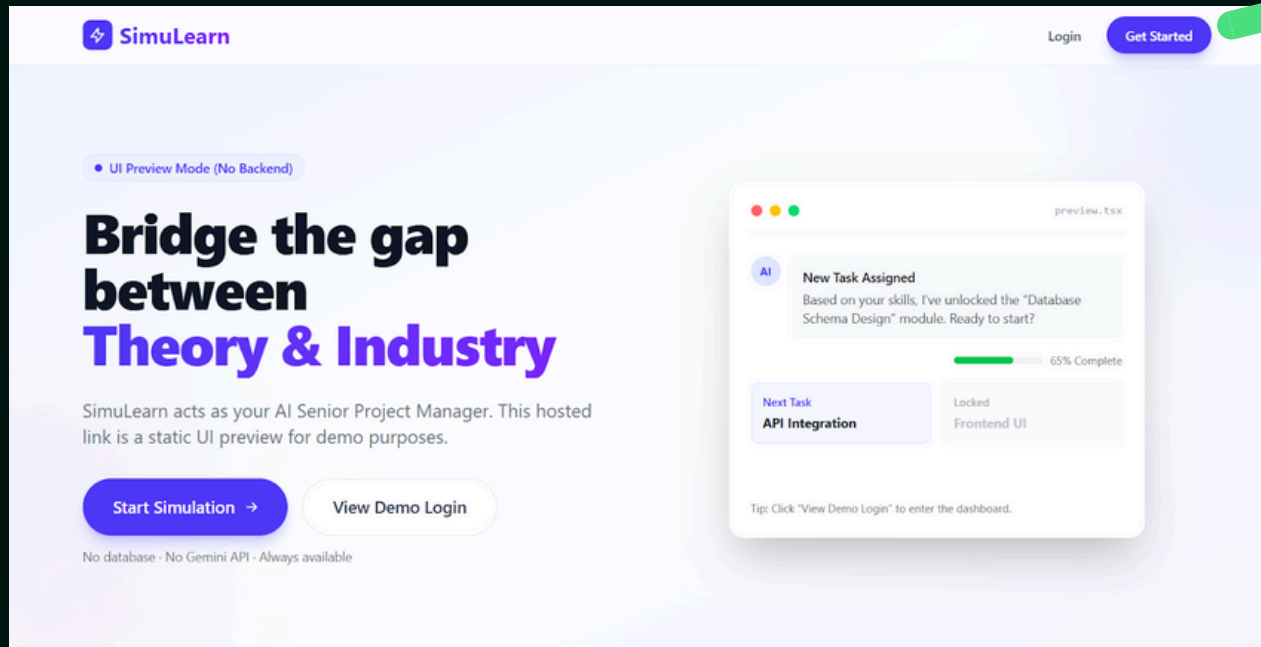

Provide real-world  
project simulation

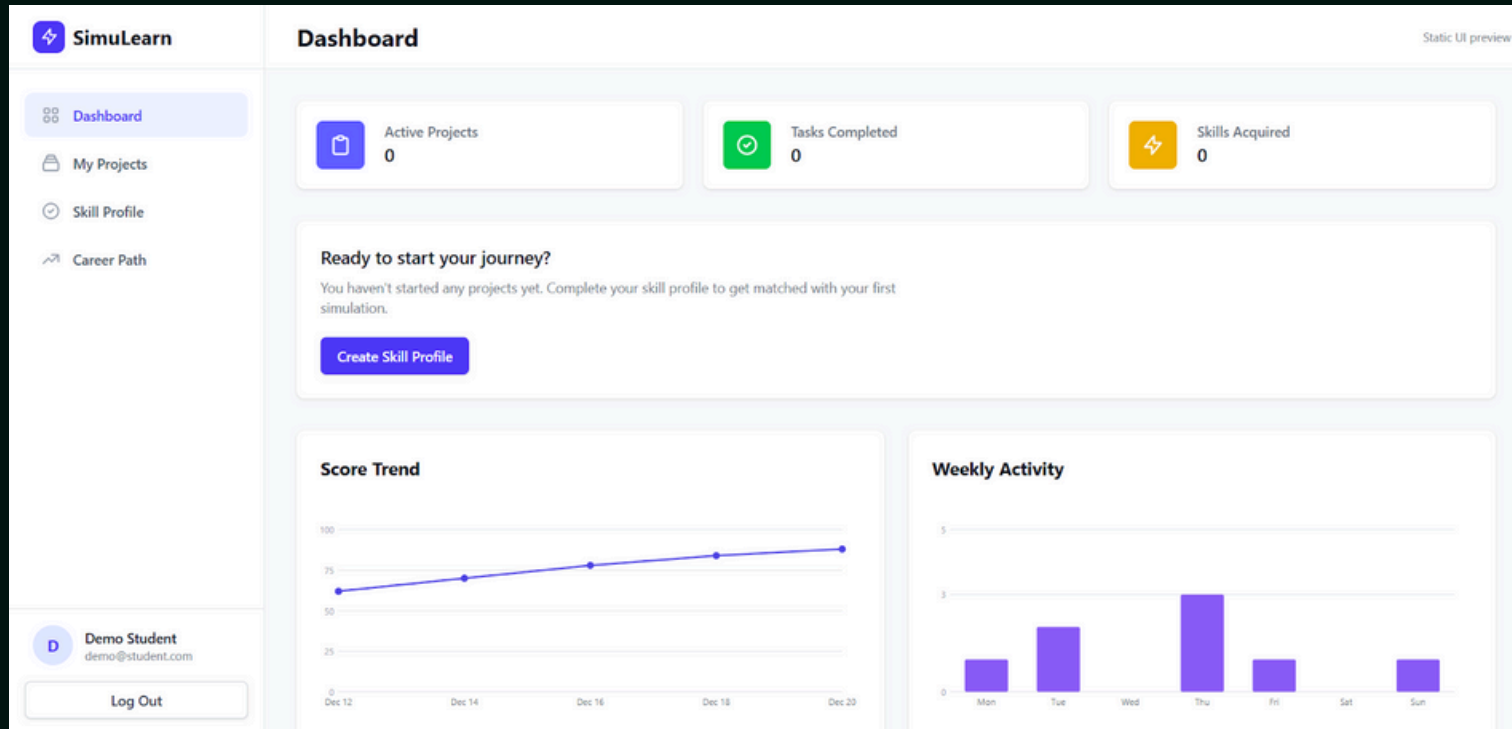

Give career  
suggestion

# 1. LANDING PAGE

This is the landing page, where user can see the platform info, and login into the platform.

## 2. DASHBOARD

This page is the central command center for the user's learning journey. It will provide visual charts of the user's recent performance and overall progress.

# 3. SKILL PROFILE

**SimuLearn** Skill Profile Setup Skip for now Save

Add your skills and experience to personalize project matching.

**SKILLS**

Search skills... All

React Tailwind CSS JavaScript Laravel REST Auth MySQL Schema Design GitHub Actions CI/CD

Selected: 7

**PROFESSIONAL BIO**

I can build website using PHP and connect to database using MySQL.

AI bio summary is mocked in this preview.

**PREVIEW**

Demo Student  
demo@student.com

BIO  
I can build website using PHP and connect to database using MySQL.

**NEXT STEP**

After saving your profile, browse the Project Library to pick your first simulation project.

[Go to Project Library](#)

**BIO / EXPERIENCE**  
I can build website using PHP and connect to database using MySQL.

**SKILLS**

React Tailwind CSS JavaScript MySQL GitHub Actions Schema Design  
Laravel

**ABILITY SUMMARY**

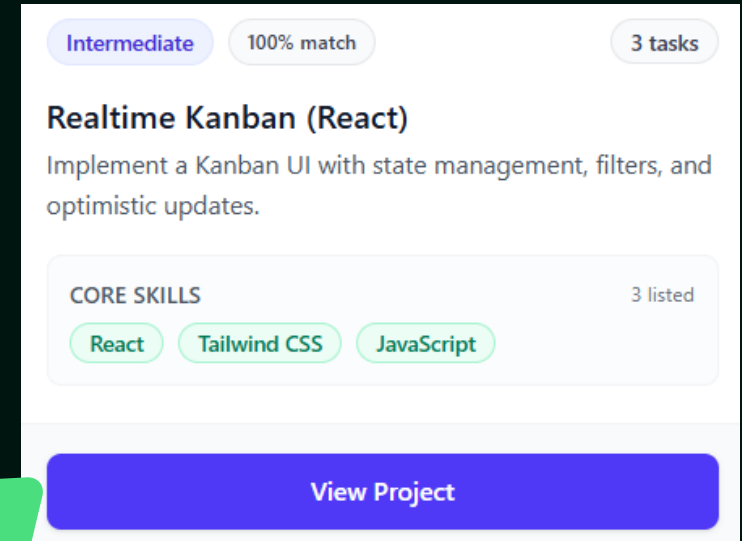

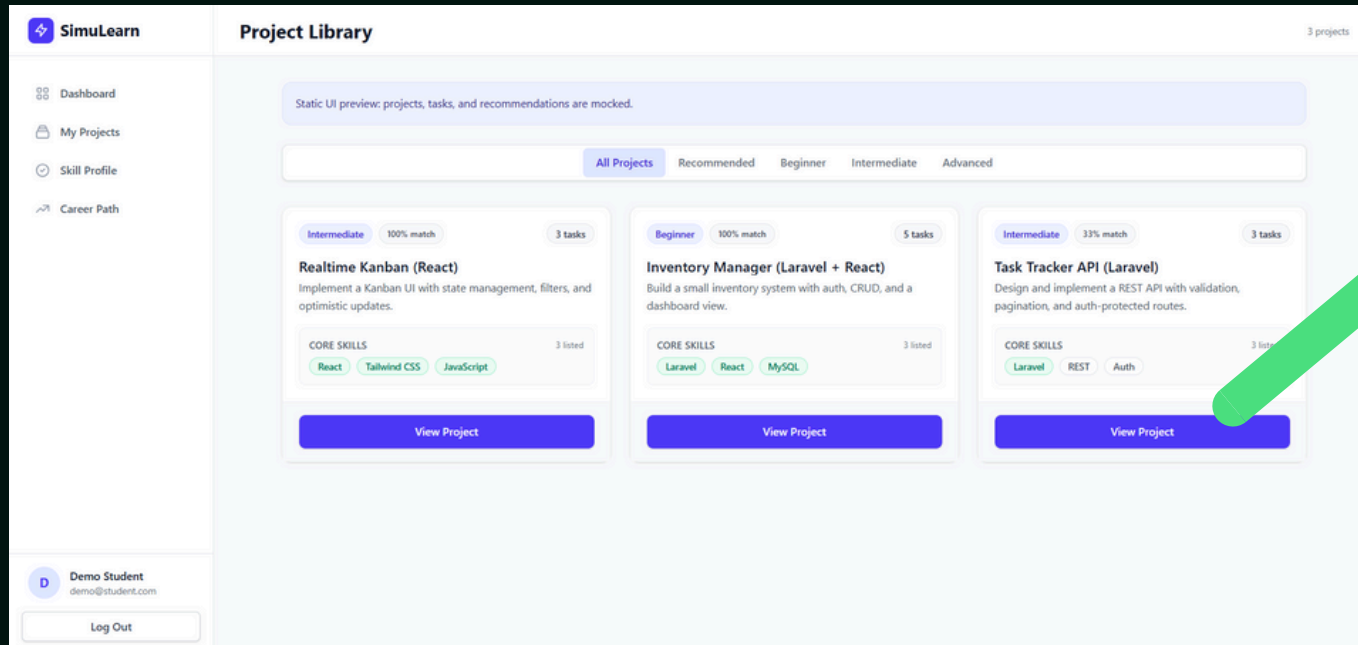

Frontend: 3 • Database: 2 • DevOps: 1 • Backend: 1

Ability is inferred from selected skills (mocked).

- Full Stack Development capabilities
- Strong proficiency in PHP and JavaScript
- Experience with Laravel and React ecosystems
- AI summarization is mocked in UI preview

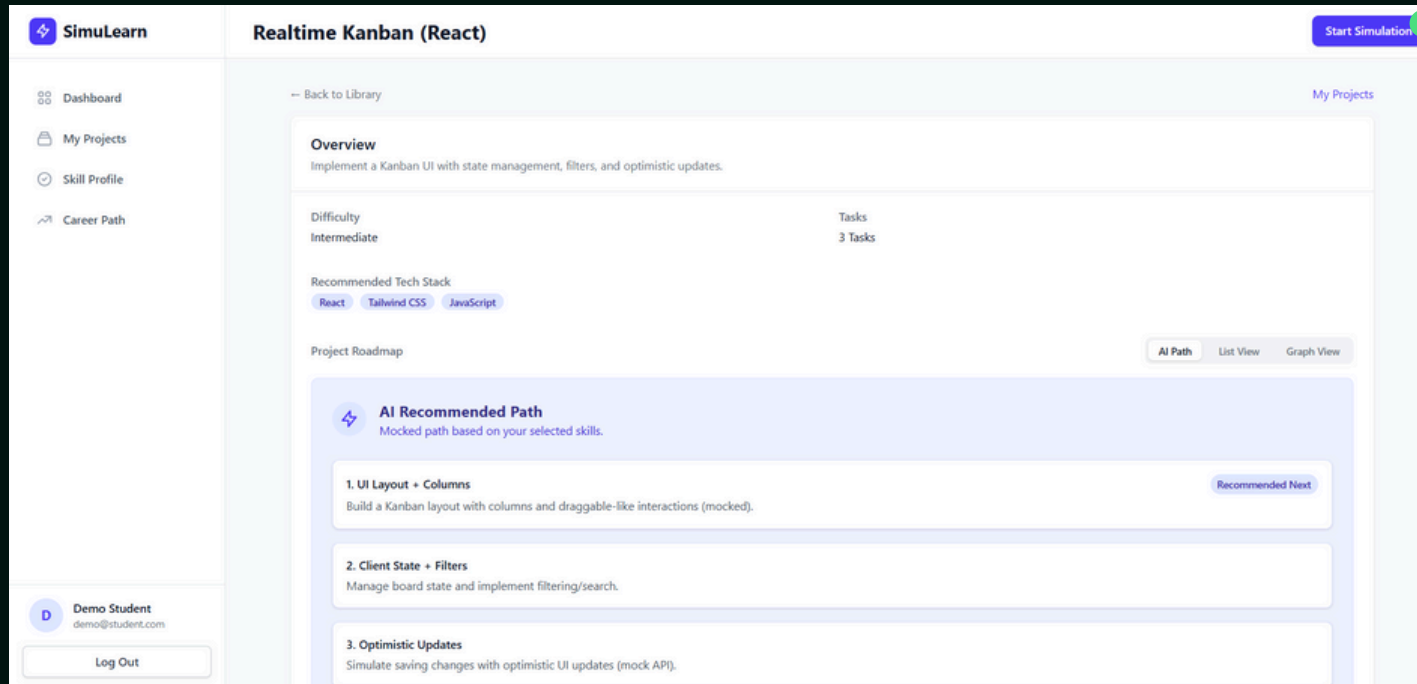

This is the user's skill profile, where users can enter their skills and abilities, and update them at any time.

# 4. PROJECT LIBRARY

This is the project library that will show the list of the available projects. It will recommend projects base on user's skills.

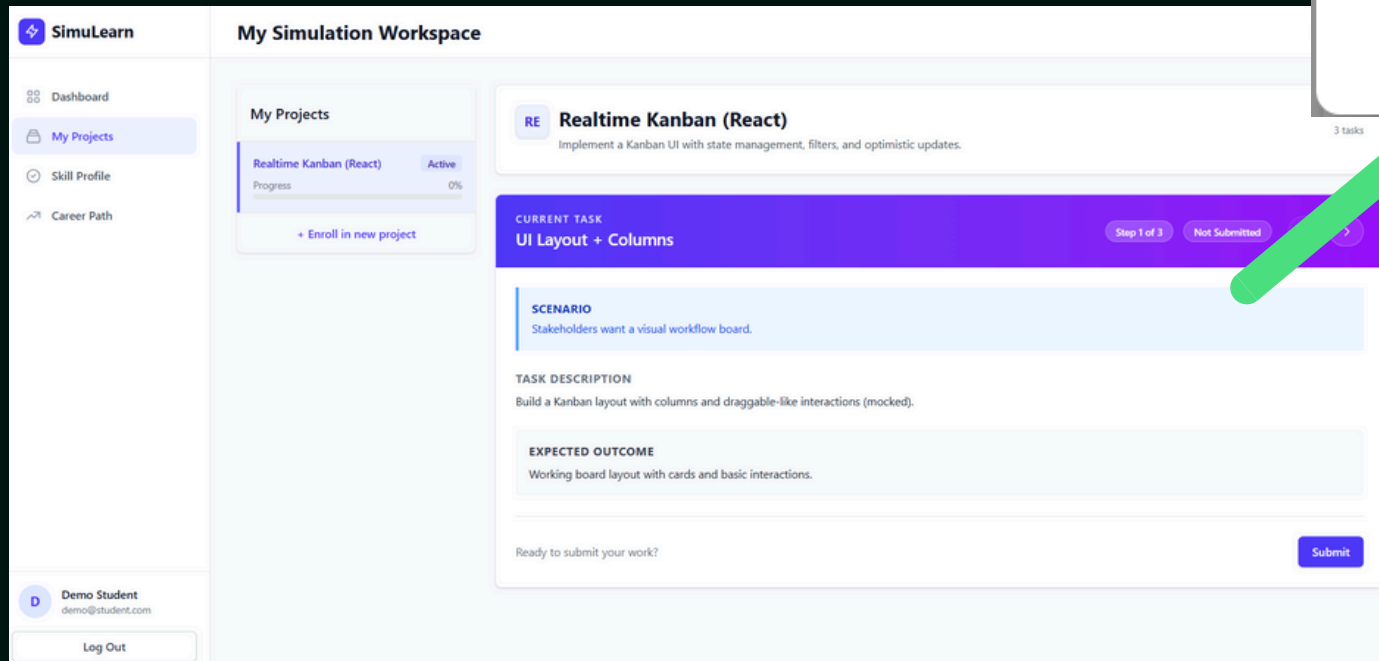

# 5. PROJECT DETAIL

Start Simulation

This is the project details page that provides a comprehensive overview of a specific project. User can click the “Start Simulation” button to start the project.

# 6. MY SIMULATION WORKSPACE

**Submit Solution (Mock)**×

Upload is not stored in this static preview. We only record the file name and generate a mocked grade.

Choose File No file chosen

CancelSubmit (Mock Grade)

This is the project workspace where users can view their task roadmap and submit their work.

# 7. SUBMISSION FEEDBACK

**Grading Result**

72/100

Grading Report: UI Layout + Columns  
Score: 72/100

Summary  
Good work – the submission meets the expected outcome. Minor improvements recommended.

Strengths

- Clear structure
- Reasonable approach

Areas for Improvement

- Error handling
- Validation
- Documentation

**SUBMISSION HISTORY**

**Attempt #2**

1/10/2026, 12:57:39 PM

File: submission\_attempt\_2.zip  
Score: 72

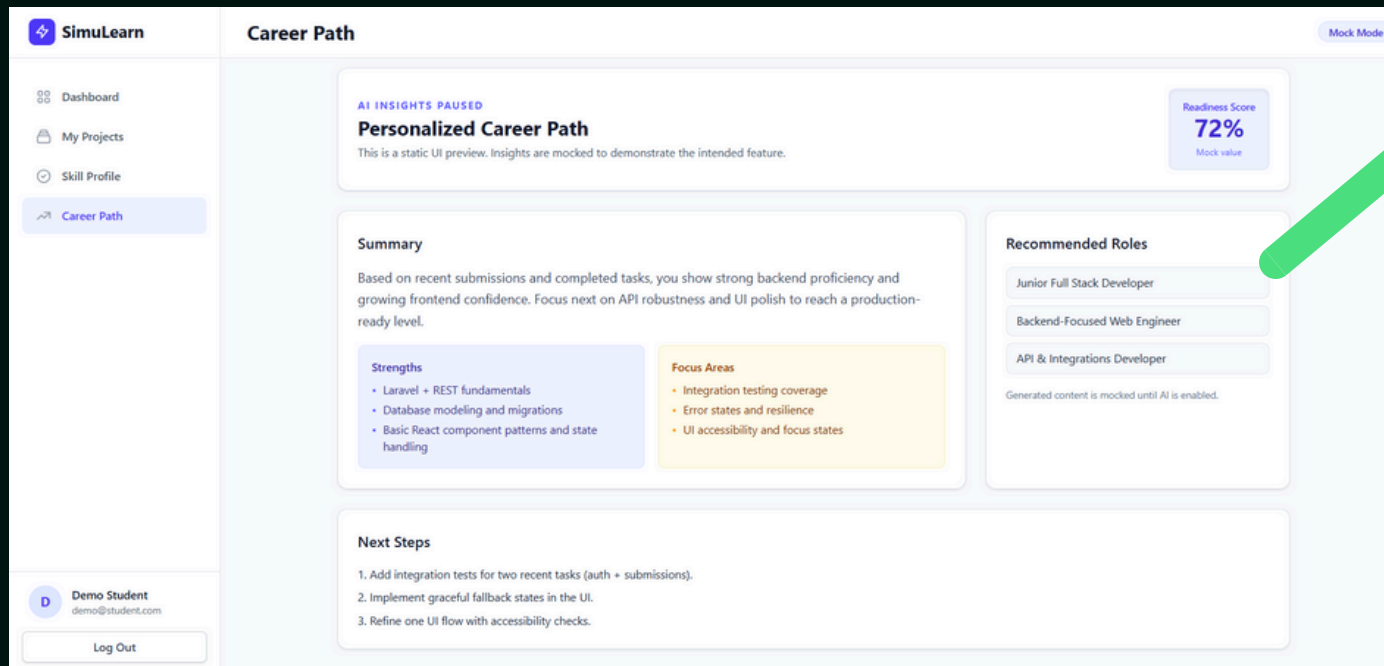

**Attempt #1**

1/10/2026, 12:54:47 PM

File: submission\_attempt\_1.zip  
Score: 55

This is the feedback shown after the user submits their work. It presents a detailed breakdown of the performance and specific feedback on strengths and areas for improvement.

# 8. CAREER PATH

## Recommended Roles

Junior Full Stack Developer

Backend-Focused Web Engineer

API & Integrations Developer

This is the career path dashboard that analyses the user's performance in the system. It will analyze the user's performance and working style, then give suggestions of future career.
